ORTHODONTIC TREATMENT OPTIONS

OPTION 1

COMPREHENSIVE INVISALIGN® TREATMENT

If you have gaps, spaces between your teeth, or even crooked and crowded teeth, Invisalign® makes it possible to have beautiful, straight teeth in just 6-12 months. With Invisalign Comprehensive treatment, nearly invisible aligners can straighten crooked, overcrowded or widely spaced teeth and fix underbites and overbites. This can be done without the "metal mouth" look of traditional braces, without long years of tightening and torture (many cases usually finish in just 6-12 months), and with more affordability than even before. All full Invisalign® cases are also covered from shifting or changes for up to 5 years, so patients can be confident in having the smile they've always wanted. Typical case fees range from \$4700 to \$5700, with multiple financing options available.

OPTION 2

MINOR MOVEMENT ALIGNERS

For patients that have noticed minor shifting or a few problematic teeth, modern technology now allows us to 3D print clear aligners to make minor tooth movements of problematic teeth. If you had braces or orthodontics in the past and have noticed slight shifting, or a couple problematic teeth, Minor Movement Aligners allow for easy, discreet correction at less cost than previously possible for patients with mild orthodontic issues. For patients that are a candidate, typical treatment time is 3-4 months and fees range from \$2300 to \$2600.

OPTION 3

VIVERA® RETAINERS

For patients that have previously undergone orthodontics OR are just starting to experience shifting or changes, Vivera® retainers are an excellent option. Vivera® retainers are made with the same state-of-the-art technology used to make Invisalign® clear aligners, are clear and virtually invisible, and 2X more durable and 30% stronger than other retainers. All Vivera® retainers are made with digital scans stored securely and permanently in the cloud, and provide years worth of protection with each order containing 4 sets of aligners. 4 sets of Vivera® retainers are \$497, with a lifetime of replacements available at a significantly reduced cost.
